EXPERIENCE

Student Team Leader | Westminster Student Union (UWSU) Oct 2026 - Present | London, England, UK | On-Site

- **Team Leadership:** Supervised and supported a shift team of up to 7 Student Callers, ensuring team members were up to date on call expectations, campaign resources, and university procedures.
- **Operations & Administration:** Managed daily call centre operations, including creating weekly staff rotas, generating daily targeted call lists, and accurately auditing student opt-out information using Microsoft Excel.
- **Student Support & Communication:** Handled first-level escalation queries from student callers, providing empathetic and assertive guidance to signpost students to appropriate university welfare and support services.
- **Data Management & Confidentiality:** Drafted and sent accurate, confidential follow-up communications via a dedicated call centre mailbox while strictly adhering to data protection guidelines.
- **Reporting & Collaboration:** Delivered daily operational updates to the Peer Support Programme Coordinator, tracking shift performance metrics and escalating complex student cases in a timely, professional manner.

Microwave Engineer (Internship) | Leonardo Jun 2026 - Aug 2026 | Luton, England, UK | Hybrid

Working within a multi-disciplinary team to design and evaluate advanced RF components used in electronic warfare self-protection systems.

- **RF Circuit & Component Design:** Assist in designing and developing microwave and RF components operating up to 40 GHz, including transmit/receive modules (TRMs) and up/down converters.
- **Simulation & Modelling:** Use industry-standard simulation tools (Keysight ADS) to model integrated RF/digital boards and optimise component performance.
- **Laboratory Testing:** Test and validate hardware designs in anechoic chambers and state-of-the-art lab environments, ensuring compliance with strict environmental and safety standards.
- **Cross-Disciplinary Collaboration:** Partner with mechanical, systems, and manufacturing teams to ensure seamless integration of RF modules into larger defence platforms.

Sales Team Member (Part-time) | Krispy Kreme Feb 2024 - Oct 2026 | Greater London, UK | On-site

- **Customer Standards:** Maintained strict operational and hygiene standards to ensure an exceptional guest experience.
- **Sales & Upselling:** Boosted daily revenue by promoting special offers and driving customer loyalty sign-ups through the rewards app.
- **Food Safety & Hygiene:** Maintained a compliant environment by following health, safety, and chemical handling protocols.

Till Operator (Part-time) | Pabulum Ltd Sep 2022 - Apr 2024 | Greater London, UK | On-site

- **Cash Handling:** Operated POS till systems accurately, processed payments, and reconciled total sales at the end of each shift.
- **Dietary Awareness:** Memorised menu ingredients and daily availability to guide customer choices and accommodate dietary restrictions.
- **Safe Food Service:** Monitored and executed the secure, hygienic distribution of food items in line with strict safety guidelines.

EDUCATION

BEng Software Engineering with Electronics | University of Westminster

Sep 2024 - Jun 2027 (Expected) | London, UK

Key Modules: Sensors & Signal Processing, Embedded System Project (WBL), Operating Systems, Real-Time Embedded System, FPGA Design

Final Year Dissertation: Analysis and Design of Wireless Energy Harvesters for Internet of Things Applications (focused on designing, simulating, and testing a wireless energy harvester including an antenna filter at 3.6 GHz for IoT and sub-6GHz 5G applications)

PROJECTS

Wireless Energy Harvester for IoT (Dissertation)

Analysing, designing, and simulating a wireless energy harvester for IoT and sub-6GHz 5G applications, including an antenna filter at 3.6 GHz. Currently in the research and literature review stage.

Jun 2026 - Present | University of Westminster

SCC Robotic Arm

Designing a beginner-friendly robotic arm toolkit and instructional guide to help Computer Science and Engineering students apply embedded programming and electronics skills. Includes prototype testing for assembly reliability, wiring layout, and responsiveness.

Apr 2026 - Present | University of Westminster

Micro Mouse Group Project

Collaborative embedded systems project using C++, Mbed, Keil Studio, GitHub, Motors, Sensors and 3D Printing to build an autonomous maze-solving robot.

Feb 2026 - Apr 2026 | University of Westminster

Number Plate Recognition System

Designed a MATLAB-based system with a GUI to isolate and identify licence plates from vehicle images using greyscale conversion, thresholding, noise removal, morphological operations and binarization.

Dec 2025 - Jan 2026 | University of Westminster

Arduino Radar System

Built a functional radar using an Arduino Nano, HC-SR04 ultrasonic sensor, S90 servo motor and Processing (open-source) for visualisation.

Sep 2025 - Oct 2025

Microcontroller Project, DAC with PIC16F877A

Created a DAC using the AFE on a PIC16F877A microcontroller, displaying thermistor data on an LCD using Assembly language in MPLAB X.

Mar 2025 - May 2025 | University of Westminster

TECHNICAL SKILLS

Languages	C++, C, Python, Assembly, MATLAB
Embedded & Hardware	Arduino, PIC16F877A (MPLAB X), Mbed, Keil Studio, Microcontrollers, Sensors, Motors
RF / EW Tools	Keysight ADS, RF Circuit Design, Microwave & RF Components (up to 40 GHz)
Software & Tools	GitHub, Autodesk Fusion 360, PICSIM, Processing (Open Source), Linux
Disciplines	Embedded Systems, IoT, Robotics, Signal Processing, Electronic Warfare, 3D Printing
Soft Skills	Communication, Teamwork, Cross-disciplinary Collaboration, Problem-solving, Customer Service

VOLUNTEERING & EXTRACURRICULAR

Volunteer | CARIS Haringey

- Activity Coordination:** Led and coordinated recreational activities (sports, painting) for children aged 8–14, ensuring safety and positive engagement.
- Logistics Support:** Assisted with setting up, moving, and organising equipment and materials for daily activities.

Aug 2024 | Children's Summer Programme

GEEP Graduate Engagement Programme | Royal Academy of Engineering

Participant in the Graduate Engineering Engagement Programme supporting underrepresented engineering students. Attended bootcamps, mock interviews, assessment centres, and a site visit to the GXO/IKEA warehouse in Dartford, gaining insight into AI, robotics, and automation in logistics.

2025 – 2026

COURSES & INTERESTS

Courses: GEEP Graduate Programme (Royal Academy of Engineering)
Interests: Leonardo Electronics, MBDA, Defence & Aerospace Engineering, IoT, Robotics, AI in Industry, FPGA
